Cellular Debris <b>2%</b>	Rbc/Wbc x 400 Field <b>2 rbc</b>
Post thaw Straw V test thaw gave rapid recovery to 90% motility and again 4/5 progression	

## Comment

**Young , keen stud male** with excellent sperm collection. 2 collections , half hour apart were combined.  
Sperm were vigorous and highly motile.  
No significant abnormalities.

Using the Clone freezing system , they froze well and demonstrated good and rapid recovery on test thaw..  
Counts with SDM1 metre

Signature of Vet Julie Gray
